

Sentera is an authorized dealer of Lockheed Martin's Indago™ AG drone. When paired with a Sentera Double sensor, the Indago AG is an ideal solution for the agriculture industry where precision data is paramount.

INDAGO™ AG

When combined with a Sentera sensor solution, the light-weight, compact and high-endurance Lockheed Martin Indago™ AG can dramatically decrease scouting time while increasing crop yields. Indago AG platforms seamlessly accept Sentera's Double sensors which provide growers with the precise data needed to make informed decisions.

Together, the Indago AG and Sentera sensors:

- Assist in measuring overall crop health
- Help growers apply fertilizer, pesticides and herbicides based on precise, timely and easy to collect data
- Assist in diagnosing growth problems
- Integrate with Sentera AgVault™ to organize, store, view and share data with a team

INDAGO AG PERFORMANCE SPECIFICATIONS

Gross takeoff weight	4.85lb
Size	32" x 32" x 7"
Range	2-10 km (dependent on radio and antenna selection)
Endurance	Up to 50 minutes
Payloads	Multiple, hot-swappable payloads
Operating altitude	10-500' above ground level (AGL)

SENTERA AGRICULTURE SOLUTION

The Lockheed Martin Indago™ AG and Sentera Double sensor work in concert together, enabling a grower to unlock the full capabilities of advanced crop assessment, previously unavailable in the agriculture industry. The Sentera Double captures normalized difference vegetation index (NDVI) and high-resolution color imagery in a single flight, decreasing time spent in the air. The information is collected with precision and is an integral part of how growers make input decisions, enabling them to increase crop yields while being good stewards of the land and environment.

SENTERA AGVAULT™ SOFTWARE SOLUTION

Once data is collected, hundreds of images must be managed to unlock the value behind the imagery. Sentera's proprietary software solution, AgVault™, enables growers to do just that. Sentera's AgVault software solution allows growers to organize, store, view, comment and share images with teams and partners, expanding the circle of impact. The Sentera AgVault software solution is compatible with many of the most popular agricultural analytics tools, making flow of imagery and information from capture to detailed analysis virtually seamless.
